Where "Net price per share of the newly issued ordinary shares" is calculated from the total proceeds the Company receives from the ordinary share offering deducted by expenses arising from the share issuance (if any) and divided by the total number of newly issued shares.

In addition, in case there is more than one offering price at the same offering of shares under the condition that the subscription must be made altogether, all the offering prices shall be used to calculate the Net price per share of the Company's newly issued ordinary shares. However, if the condition on the subscription being made altogether does not apply, only the offering price that is lower than 90 percent of the Market price per share of the Company's ordinary shares shall be used for the calculation.

In such case, the Company's decision on such matter shall be deemed as final. The Company shall inform SEC, SET, and Registrar of Warrants within 15 days from the date of the occurrence of such events.

For the Exercise Ratio, the new ratio is still calculated based on the method specified in Clause 5.1 – Clause 5.6.

5.9. The Company may consider the adjustment of the exercise price along with the issuance of new warrants instead of adjustment of the exercise ratio.
